Real Solutions ⏻ Reliable Support

Onity

Smart energy management will improve both your bottom line and your guests' comfort

Onity presents our feature rich line of products with innovative designs and unsurpassed performance.

With models for every application, they provide substantial savings and rapid return on investment, without compromising comfort.

Presence based (on-line) intelligent thermostats

Senercomm range

SensorStat® DDC

It merges digital temperature control with PIR occupancy sensing and HVAC setback strategies, to generate important energy savings while improving guest comfort.

- ☐ Automatically sets the temperature to pre-programmed energy saving levels (setback) depending on the room being Occupied, Unoccupied or Unsold
- ☐ Refresh cycle
- ☐ Open window control
- ☐ Humidity sensor
- ☐ Lights control

InnPULSE® On-line central monitoring and management (optional)

InnPULSE® software, working in conjunction with the SensorStat® DDC thermostats, expands the system into an interactive communication network in real time, directly linking other electronic devices and HVAC systems via existing cable-TV wiring.

- ☐ Microsoft Windows® compatible
- ☐ Real time management reports
- ☐ Predictive maintenance, HVAC problem detection and engineering default alarms
- ☐ Patented "5 Star" humidity & condensation control
- ☐ Privacy Please! module (optional)

Energy saving devices
Intellity range

> **Intellity Basic** - Mechanically operated with any card type
> **Intellity Mag Intel** - Reads magstripe cards and activates accordingly
> **Intellity Dual Intel** - Same as Mag and also recognises Smart cards
> **Intellity RFID Intel** - Reads RFID MiFare® cards and activates accordingly

- Intelligent energy saving device which differentiates guest and master cards*
- Activates one or two relays depending on the information read from the magstripe (i.e. lights for all valid cards and TV only for guests)*
- Timed courtesy light; cuts electric circuits with a delay after removing the card
- Attractive light for easy location in the dark
- No need to communicate with portable programmer
- Installation in standard electrical box

* Not applicable to Intellity Basic

Onity systems offer you up to 65% energy savings   while protecting the environment

Energy saving devices
OniSwitch range

> **OniSwitch Basic** - Mechanically operated with any card type
> **OniSwitch Mag Intel** - Reads magstripe cards and activates accordingly
> **OniSwitch Prox** - Recognises contactless SR512 technology cards
> **OniSwitch RFID** - Recognises RFID MiFare® technology cards

- Energy saving device which activates lights upon keycard insertion
- Intelligent version available (OniSwitch Mag Intel) which differentiates guest and master cards; activates one or two relays depending on the information read from the magstripe (i.e. lights for all valid cards and TV only for guests)
- Timed courtesy light; cuts electric circuits with a delay after removing the card
- LED lights for easy location in the dark
- No need to communicate with portable programmer
- Wall surface installation
